E-04204A-12-0504 OF UNS ELECTRIC, INC., FOR THE DECISION NO. 74744 9 ESTABLISHMENT OF JUST AND REASONABLE RATES AND CHARGES **ORDER** 10 DESIGNED TO REALIZE A REASONABLE RATE OF RETURN ON 11 THE FAIR VALUE OF THE PROPERTIES OF UNS ELECTRIC, INC., DEVOTED TO 12 ITS OPERATIONS THROUGHOUT THE 13 STATE OF ARIZONA AND FOR RELATED APPROVALS. - APPLICATION 14 FOR APPROVAL OF A RESIDENTIAL SUPER-PEAK TIME-OF-USE TARIFF. 15 (DOCKET NO. E-04204A-12-0504) 16 Open Meeting 17 September 9 and 10, 2014 Phoenix, Arizona 18 19 BY THE COMMISSION: 20 **FINDINGS OF FACT** 21 UNS Electric, Inc. ("UNSE" or "the Company) is certificated to provide electric 1. 22 service as a public service corporation in Arizona. 23 2. In Decision No. 74235 (December 31, 2013), the Arizona Corporation Commission ("Commission") approved a Settlement Agreement in UNSE's general rate case that 24 provided for the establishment of new rates and charges. As part of that Decision, the 25 Commission ordered UNSE "...shall file within 90 days of the effective date of this Decision... a 26 27 Super-Peak Time-of-Use Tariff'. 28

On April 1, 2014, UNSE submitted the present application that requests approval 3. of the tariffs required by Decision No. 74235.

# Proposed Residential Super Peak Time-of-Use Tariff

- 4. UNSE proposes a residential Super Peak Time-of-Use tariff that features a rate design whereby customers taking service under this tariff would pay a higher per kWh charge for electricity consumed during defined "super-peak" hours in exchange for a corresponding lower kWh charge during all other hours. Time-of-Use ("TOU") rates are typically designed to encourage and incent customers to shift load away from system peak load periods to other times of the day when the utility's marginal cost of generation is lower.
- 5. UNSE presently offers one other residential TOU rate schedule. The Residential Service TOU (RES-01 TOU) tariff has a Summer On-Peak period from 2:00 p.m. until 8:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day), and Winter On-Peak periods from 6:00 a.m. until 10:00 a.m. and 5:00 p.m. until 9:00 p.m. Monday through Friday (excluding Thanksgiving Day, Christmas Day, and New Year's Day).
- 6. In contrast to UNSE's existing TOU rate schedule, the TOU time period specified in the Super Peak tariff is much more narrowly defined as shown below:
  - The Summer On-Peak period is 5:00 p.m. to 8:00 p.m., Monday through Friday (excluding Memorial Day, Independence Day, and Labor Day).
  - The Winter On-Peak period is 5:00 p.m. to 8:00 p.m., Monday through Friday (excluding Thanksgiving Day, Christmas Day, and New Year's Day).
  - All other hours are Off-Peak. If a holiday falls on Saturday, the preceding Friday is designated Off-Peak; if a holiday falls on Sunday, the following Monday is designated Off-Peak.
- 7. In exchange for the shorter On-Peak periods offered under the proposed Super Peak rate, customers would pay relatively higher energy rates for On-Peak and Off-Peak consumption compared with the existing TOU tariff. In the proposed Super Peak rate, both On-Peak and Off-Peak rates are calculated using an inclining-block rate design. Table I below compares the customer charges

and energy charges between the existing RES-01 and RES-01 TOU rate and the Proposed RES-01 TOU Super Peak rate.

	. UNSE Re	sidential TOU	J Rate Comparison		
	Existing Residential Service (RES-01)		Existing Residential TOU (RES-01 TOU)	Proposed (RES-01 TOU SuperPeak)	
Monthly Customer Charge	\$10.00		\$11.50	\$11.50	
Total Energy Rate (\$/kWh)					
Summer On-Peak	0 - 400 kWh: \$0. 400 - 1,000 kWh: \$0. Over 1,000 kWh: \$0. nter On-Peak		\$0.15996	First 400 kWh: \$0.1950 Over 400 kWh: \$0.2050	
Summer Off-Peak		\$0.083810 \$0.098860	\$0.06996	First 400 kWh: \$0.0647 Over 400 kWh: \$0.0747	
Winter On-Peak		\$0.103009	\$0.15996	First 400 kWh: \$0.1750 Over 400 kWh: \$0.1850	
Winter Off-Peak			\$0.06174	First 400 kWh: \$0.0637 Over 400 kWh: \$0.0737	

8. The proposed Super Peak TOU tariff would be available to all single-phase residential electric service in individual private dwellings and individually metered apartments when all service is supplied at one point of delivery and energy is metered through one meter. UNSE proposes that a customer electing to take service under this tariff must remain on the tariff's rate schedule for a minimum of one year.

# Staff's Analysis

9. Staff has reviewed the proposed Super Peak TOU tariff, the bill impact analysis, and associated work papers provided by UNSE. Staff finds that the proposed tariff comports with the Commission's directives in Decision No. 74235. Staff further finds that the proposed Super Peak TOU will be cost effective immediately for existing residential customers switching from the existing TOU tariff, regardless of whether the customer shifts their consumption to off-peak hours. Residential customers with extra-high consumption switching from the Standard Rate (RES-01) would also see immediate savings. Customers with typical to high consumption on the Standard Rate would find the proposed rate cost effective, providing that they shift 15-25 percent of their consumption to off-peak hours.

10. The instant Application represents the first introduction of a Super Peak TOU tariff to
UNSE's customers. Therefore, Staff has recommended that customers be offered a three month trial
period in which the customer can test the Super Peak TOU tariff to ensure that anticipated bill savings
actually occur.

11. Similarly, UNSE may wish to adjust the Super Peak period hours based on the level of customer participation. Such adjustment of the Super Peak hours shall require approval of the Commission.

#### Staff's Recommendations

- 12. Staff has recommended that customers be offered a three month trial period in which to test the efficacy of the Super Peak TOU tariff, based on the customer's consumption patterns.
- 13. Staff has further recommended that UNSE be allowed to adjust the Super Peak period based on the level of customer participation, subject to approval by the Commission.
- 14. Staff has further recommended that UNSE's Residential Super Peak TOU Tariff (RES-01 TOU Super Peak) be approved as discussed herein.

### CONCLUSIONS OF LAW

- 1. UNS Electric, Inc. is an Arizona public service corporation within the meaning of Article XV, Section 2, of the Arizona constitution.
- 2. The Commission has jurisdiction over UNS Electric, Inc. and over the subject matter of the Application
- 3. UNS Electric, Inc. Application herein is in compliance with the Commission's Order in Decision No. 74235 and the Application satisfies the requirements set forth in that Order.
- 4. The Commission, having reviewed UNS Electric, Inc.'s Application and Staff's Memorandum dated August 26, 2014, finds that the Residential Super Peak Time-of-Use Tariff (RES-01 TOU Super Peak) should be approved as discussed herein.

## **ORDER**

IT IS THEREFORE ORDERED that UNS Electric, Inc.'s Residential Super Peak TOU Tariff (RES-01 TOU Super Peak) is approved as discussed herein.

IT IS FURTHER ORDERED that customers be offered a three month trial period in which to test the efficacy of the Super Peak TOU Tariff, based on the customer's consumption patterns.

IT IS FURTHER ORDERED that this Decision shall become effective immediately.
